PROFESSIONAL SUMMARY

Data Scientist at Danone building global KPI reporting and automation for Quality & Food Safety. MSc in Data Science & Marketing Analytics, with experience in Python, Power BI, predictive modelling and NLP. Looking to apply predictive modelling and automation to sustainability, health, and sports performance challenges.

PROFESSIONAL EXPERIENCE

Danone | Hoofddorp, Netherlands (Hybrid) Jan 2026–Present

Global QFS Data Scientist. *Jul 2026–Present*

• Own the Power BI QFS Performance dashboard, integrating data from SAP, Veeva and other source systems to track 8 KPIs across 120+ countries, 300+ production sites and 146+ brands.

• Automated data collection and reporting workflows (Power Automate & Python scripts), reducing manual reporting time.

• Partner with global and regional QFS stakeholders to turn reporting needs into clear, actionable KPIs that support quality performance across Danone's value chain.

Global QFS Performance Data Analyst Intern. *Jan 2026–Jul 2026*

• Led the global rollout of DAN Performance, coordinating onboarding and training to drive adoption; automated OneSource data extraction and resolved reporting inconsistencies.

Costa Teguise Golf Club | Lanzarote, Spain Feb 2025–Aug 2025

Receptionist & Marketing Assistant. *Full-time*

• Analysed customer data to improve campaign targeting and maintained CRM data accuracy in Excel.

PayServ Payroll Solutions | Bardonia, New York Jan 2023–Jul 2024

Junior Finance Specialist. *Jun 2023–Jul 2024*

• Reconciled financial data in QuickBooks and automated Excel/Google Sheets reporting, improving processing speed and reducing manual errors.

Payroll & HCM Intern. *Jan 2023–May 2023*

ACADEMIC & RESEARCH PROJECTS

Erasmus University | 2026

MSc Thesis – Consumer Perceptions of Branded Resale Channels

• Analysed 49,736 reviews across 48 brands; applied LDA topic modelling, VADER sentiment analysis and difference-in-differences models to assess consumer perceptions and resale launches.

UNICEF – Donor Retention & Customer Lifetime Value

• Built an XGBoost model to forecast donor retention and lifetime value using demographic and survey data, identified churn-risk segments and simulated targeted interventions with agent-based modelling, presented to UNICEF.

EUR Hack NL – AI Hackathon

• Prototyped an LLM-enabled web app using real-time marine APIs to develop an early-warning tool for salmon farms.

SKILLS

Programming & Data: Python (pandas, scikit-learn, XGBoost), R, SQL (querying, joins, aggregation)

BI & Business Tools: Power BI (DAX, KPI dashboards), Power Automate, Excel (Power Query), SAP, Veeva

ML, Statistics & NLP: Classification, regression, clustering, churn prediction, DiD, agent-based modelling, LDA, VADER

Languages: Spanish (native), Russian (native), English (professional)

EDUCATION

Erasmus University Rotterdam | MSc Data Science & Marketing Analytics, Jul 2026

St. Thomas Aquinas College, New York | BS Business Management; minors in Economics & Computer Science, May 2023 | GPA: 3.90 • Presidential Leadership Award; Distinguished Dean's List; Academic & Sport Scholarships.

ADDITIONAL

SSI Divemaster (2024–Present) • Volunteer, coral restoration initiative, Philippines (2024) • Fair Trade marketing intern with Peruvian women entrepreneurs (2023) • Team lead, solar-panel recycling business case, aligned with UN Sustainable Development Goals (2023)
